Tip: VarAC Wednesday

The background image shows a large, historic Dutch castle, likely the Stadsburg van Amersfoort, at dusk. The castle features multiple towers with conical roofs and a central gatehouse. The scene is illuminated by warm streetlights and the soft glow of the setting or rising sun, creating a golden light on the castle's walls. The castle is situated behind a canal, and its reflection is visible in the water. A stone bridge with a metal railing is in the foreground on the left. The sky is a mix of light blue and green, suggesting a digital color grade.
